

Heli-One Colorado Establishes Arriel 2 Overhaul Capabilities

(Mar 7, 2011)

Heli-One is pleased to announce it has established full Arriel 2 overhaul capability at its Heli-One America Support LLC in Fort Collins, Colorado.

After installing full Arriel 2 overhaul capability at Fort Collins, Heli-One can now service all Arriel 2 types in its state-of-the-art engine workshop.

This will allow Heli-One to maximize the potential of its centralized location in Fort Collins and state-of-the-art facility by tapping into a broader range of newer aircraft models.

"By adding the Arriel 2 overhaul capability to our existing Arriel 1 and Artouste product line, we have taken another step to offering our customers the full range of Turbomeca engine overhaul capability," said Peter Loeb, General Manager of Heli-One Colorado.

Heli-One is the world's largest, independent helicopter support company, providing engine and component repair and overhaul, modifications, inspections, completions and logistics support for 20 different aircraft types, operated by customers around the world.

Heli-One Colorado offers base maintenance, engine overhaul and component overhaul capability for a wide range of civil helicopters.

Heli-One can be found at booth 2814 at HAI's Heli-Expo show, March 6-8 in Orlando. For more information about Heli-One, its approvals, and capabilities, please drop by our stand or visit our website: www.heli-one.ca.
